## **SIDE NOTES:**

Henry Ford was always dropping into the offices of the executives of his company. When asked why he didn't have them come to him, he said "Well, I'll tell you. I've found that I can leave the other fellow's office a lot quicker than I get him to leave mine."

## **FUN FACTS ABOUT CARS:**

...The first U.S. automobile racetrack was the Indianapolis Motor Speedway. The driving surface was made of more than 3 million small rocks, called cobblestones.

...In its first year of production, the Volkswagen Beetle was purchased by only 330 Americans.

...In 1916, 55% of the world's cars were Model T Fords—a record that has never been broken.

...135 million cars travel the nation's roads and interstate each day.

...The first Ford cars had Dodge engines.

## **TRUNK TAKE ALONGS:**

...A bleach bottle cut in half, the top makes a good funnel.

...A squeeze bottle full of club soda or cola. Nothing is better for removing grease build-up on the windshield.

...An old window shade or woven beach mat. Unrolled, makes a great mat to protect clothing when changing a tire.

...Reflector tape—cover a burned out headlight with it until you can get a replacement.
